

A Sustainable Christmas 可持續聖誕

Collect food waste for recycling
收集廚餘以作回收

DonaTe to the needy
捐助予有需要人士

Handmade decorations & gifts
自製環保裝飾及禮物

Add yourself to “Do not **M**ail list” for unwanted shopping catalogs
取消訂閱不需要的購物目錄

Reduce & **R**ecycle
減少用量及回收

Insulation to keep your home warm
安裝隔熱設施保持室內和暖

Avoid **A**rtificial trees
避免選購人造聖誕樹

Sustainable lifestyle throughout the year
全天候實踐可持續生活模式

Sustainable seafood & eat green
購買環保海鮮及綠色飲食

GREEN CHRISTMAS

Why Microbeads matter? 塑膠微粒的影響?

The microbeads give beauty products a grainy texture for exfoliation. These plastic tiny beans are too small to be filtered by sewerage system, they flow to the sea and other water sources while absorb toxins at the same time, which affect health of both marine life and ours!

美容產品中的塑膠微粒能做出柔軟質感和去角質的功效。但這些微粒體積極細小，污水系統並不能將之濾走，流進大海或其他水源的微粒在漂流過程中吸收有毒物質，最終影響海洋生物及人類健康。

What to do? 下一步可以做甚麼？

Check ingredient label, see if the products contain the following ingredients of microplastics. 看看產品成分標示上有沒有以下添加塑膠微粒成份:

- Polyethylene (PE) 聚乙烯
- Polymethyl Methacrylate (PMMA) 聚甲基丙烯酸
- Polypropylene (PP) 聚丙烯
- Polyethylene Terephthalate (PET) 聚對苯二甲酸乙二酯
- Nylon 尼龍

Awards & Recognitions 獎項及嘉許

Certificate of Appreciation for O.PARK1 Project

「有機資源回收中心」第1期感謝狀
Environmental Protection Department
環境保護署

Indoor Air Quality Certificate Award

Recognition of 10 years Commitment to the IAQ Certification Scheme
優質室內空氣質素嘉獎狀 《持續十年參與室內空氣質素檢定計劃》
Environmental Protection Department
環境保護署
